Parts & Description

Built-in MicroSD Card Slot

You can insert a MicroSD card to record footage

Weatherproof

Resistant Polycarbonate casing

HD Video

Camera captures full colour, high quality 1080P video in the day and switches to infrared (B&W) at dusk to continue recording clear 1080P video even in total darkness

Wireless Transmission

Connect wirelessly to your router so you can view securely on your PC, Smartphone or Tablet from anywhere in the world

DO-IT-YOURSELF

Quick and easy to install with an adjustable mount allowing you to get the perfect viewing angle and lock it securely in place

Two-way Audio

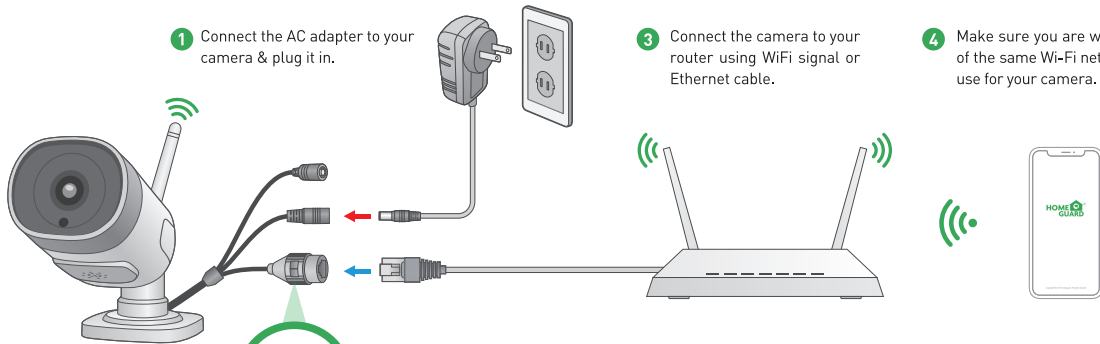

You can hear what's going on and talk back due to the built-in mic/speaker units

Step 1 Power on Camera

1 Connect the AC adapter to your camera & plug it in.

3 Connect the camera to your router using WiFi signal or Ethernet cable.

4 Make sure you are within range of the same Wi-Fi network you'll use for your camera.

2 If you see the green and yellow lights flashing, camera waiting to connect.

LED status

LED indicator shows operational status with colors. Refer to table below for detailed meaning of the LED indicator.

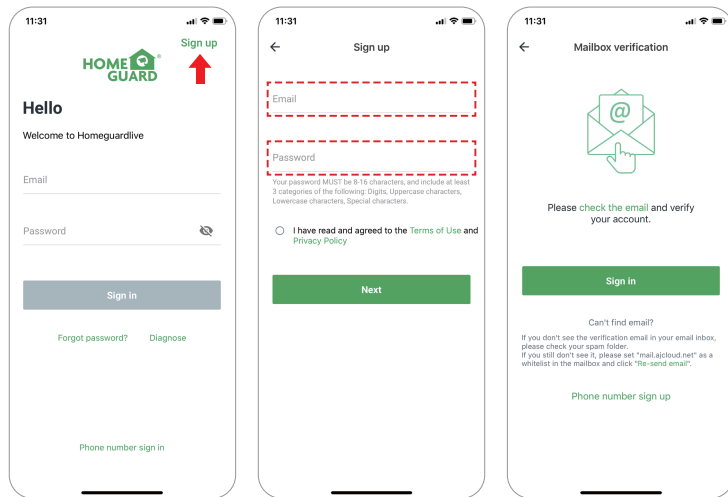

Indicator Light Status	Device Status
● Yellow lights is solid on	Power up and activating
☀ Green and Yellow lights are blinking alternately	The device is ready to connect
🌿 Green light is blinking quickly	The device is receiving the WiFi signal or connecting to the WiFi
● Green light is solid on	The device is connected to the network
☀ Yellow light is blinking quickly	The device is restore to factory default
❌ Green light goes off	The device failed to connect to the network

Step 2 Get the App

For the best experience, download the HomeGuardlive app for your smartphone by scanning the QR code below or searching for "HomeGuardlive" in the app store or Google Play.

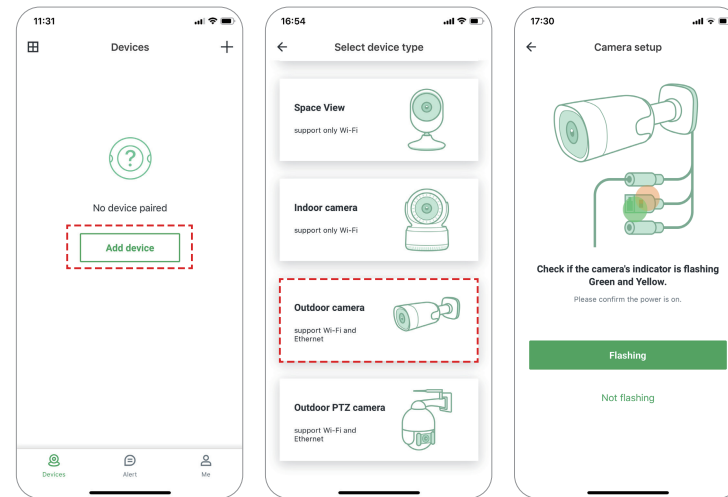

Step 3 Account Register

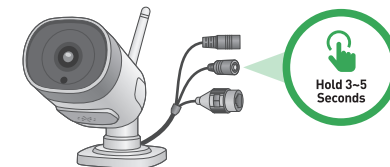

- 1 Open Homeguardlive App, then select Sign up.
- 2 Enter your email. Create a password at least 8 characters long. Your password must include three of the following:
 - At least one uppercase letter
 - At least one lowercase letter
 - At least one number
- 3 You will receive an email with your Activation Link. Open the link to activate your account. Go back to login your account after activation successful.

Step 4 Add device

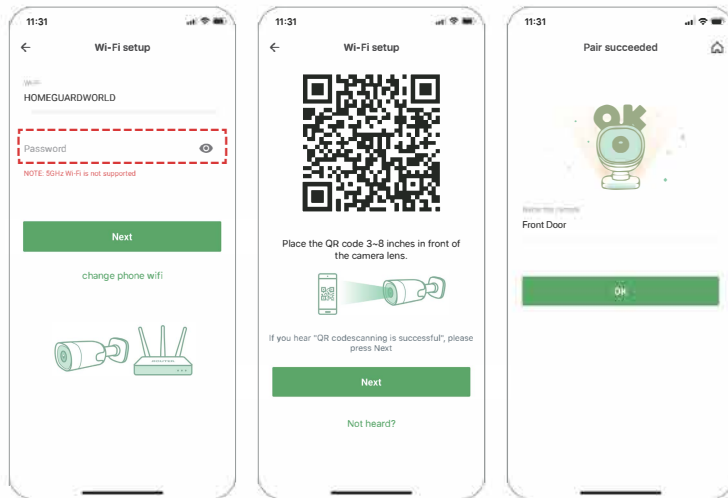

- 1 Login your account and tap “Add device”.
- 2 Choose the “Outdoor Camera” → “Two-LED-cable” → “Wi-Fi connection by QR code” to connect.
- 3 Check if the camera’s indicator is flashing Green and Yellow. If not, Please try to reset the camera.

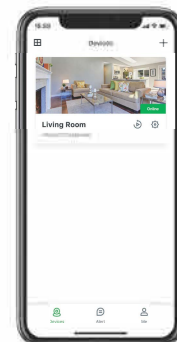

Reset Method: Keep the camera powered on for more than 1 minute, then press and hold “Reset” button until the LED turns yellow.

Step 5 Connect to Network

- 1 Enter the correct Wi-Fi password.
Note: *The camera is not support 5GHz Wi-Fi.*
- 2 This App will generate a QR code, place the QR code 3-8 inches in front of the camera lens. when the camera prompt **"QR code scanning is successful"**, press **"Next"** and wait a moment.
- 3 Name the camera after the Pairing is successful. Press **"OK"** to complete the add operation.

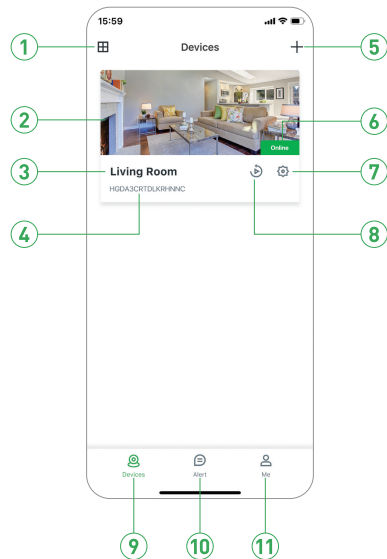

You're Done!

Congratulations! Your camera is set up and ready to go.

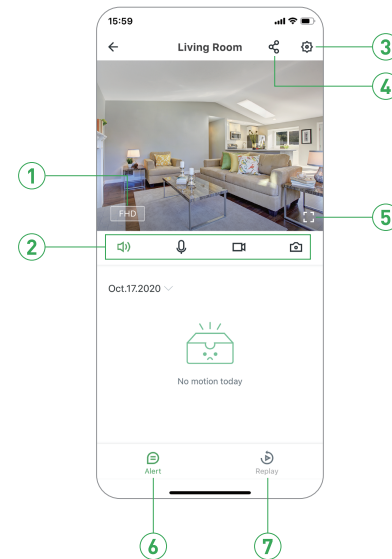

You are now free to position your camera anywhere in your home where you get a WiFi signal and view it remotely from anywhere in the world on your Smartphone or Tablet!
