HOME GUARD

Get the App

For the best experience, download the Homeguardcare app for your smartphone by scanning the QR code below or searching for ¨**Homeguardcare**¨ in the app store.

Available on the **App Store**

ANDROID APP ON **Google play**

Network Connection

🔴 Connect the AC adapter to your camera and plug it in.

🔵 Connect the camera to your router via WiFi Configuration Guide.

LED status
LED indicator shows operational status with colors. Refer to table below for detailed meaning of the LED indicator.
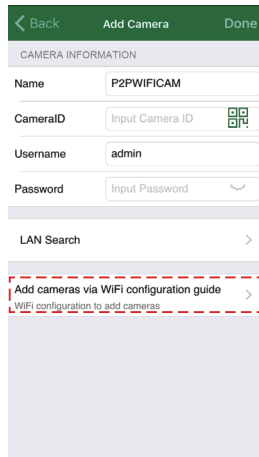

LED Indicator	Network status indicator Blue colour	Working status indicator Red colour
Blinking quickly	WiFi configuration successful	Beginning upgrade
Blinking slowly	Connecting to WiFi by One Key Configuration on App	The device works normally but no Internet connection
Keep blue (Network status) Keep red (Working status)	1. WPS configuration: searching for available WPS device 2. WiFi mode: connecting to WiFi signal	Internet connected
The indicator is off	WiFi connection failed	Device not operational

🟢 Make sure you are within range of the same Wi-Fi network you'll use for your camera.

Step 2 WiFi Configuration Guide

Add Camera

1. Launch Homeguardcare App, Click **"Add Camera"**

2. Select **"Add cameras via WiFi Configuration Guide"**
3. Select **"Please scan the camera's QR code"** and scan the QR code on the bottom of the camera
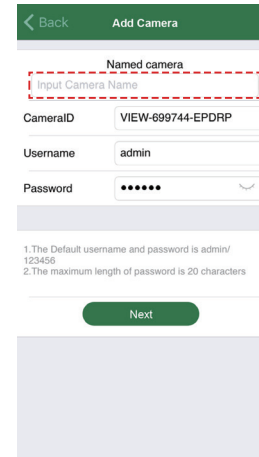

4. Name the camera and click **"Next"**

5. Input correct WiFi password and click **"Next"**

6. The camera will try to connect WiFi network (the default process is 90 seconds)

7. If connected, it will go back to the Camera page and add the device automatically

You're Done!

Congratulations! Your HOMEGUARD Camera is set up and ready to go.

• You are now free to position your camera anywhere in your home where you get a WiFi signal and view it remotely from anywhere in the world on your Smartphone or Tablet!
• Please remember to change your password in the Advanced Setting-User Setting.
• Record your new password here:_____.

Before you begin your IP Camera Set up, please:

✔ Have your IP Camera and power adapter ready.
✔ Have your iOS / android device available to download the Homeguardcare app.
✔ Make sure you are within range of the same Wi-Fi network you'll use for your camera.
✔ Run the app and add camera by scan the QR code at the bottom of the camera; Then input the user name and password.
✔ Click "**More**", select "**Wi-Fi Config**", fill in the Wi-Fi password and click "**Configuration**".
Tips:
1. Please put your smartphone near to the router.
2. Input WiFi SSID and password, click config button, then WiFi setup is finished.
3. When WiFi indicator flash slowly (camera will be in this status after powered-on and hold for 5 minutes), it means you can start config WiFi. After config is successful, WiFi indicator will flash fast for a while.
